## PNEUMATIC “HOG” C-RINGS

---

C-Rings, also know as “hog” rings, when combined with air-powered ringing tools, offer a reliable, low-cost fastening systems with virtually unlimited possibilities. Some typical applications included:

- Assembling insulated blankets for heated pressure vessels and piping systems.
- Attaching fabrics and sheet materials to wire in the automotive upholstery, bedding and furniture industries.
- Connecting intersecting or parallel wires for cage, trap and fencing assemblies.

The C-Ring does not expose dangerous points, but forms a helical-shaped closure with rings' two ends folded down parallel to each other. Blunt or sharp rings may be particularly suitable for a number of applications, including piercing of fabrics and sheet materials.

Model SC-761 and SC-743 air guns are the most commonly used tools for the industrial insulation industry. These guns utilize a 1/2" C-Ring, with a wire diameter of .060". The other ring specifications are as follows:

Pieces per box	10,000; 11,000
Pieces per strip	100
Standard material	Stainless Steel
Minimum ID ring size	1/8" ( Model SC-761)
	3/16" (Model SC-743)
Maximum ID ring size	7/32" (Model SC-761 and 743)
